

SHARPSGUARD®

Waste Segregation

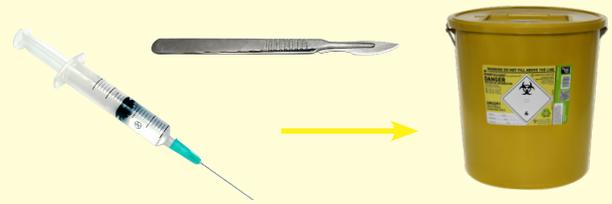

Cytotoxic/Cytostatic Waste:

Our SHARPSGUARD® cyto range is used for the disposal of syringes, needles, cartridges, empty or partially used injection vials/ampoules and other sharp instruments that have been contaminated with cytotoxic or cytostatic medicines.

Sharps Waste:

Our SHARPSGUARD® yellow range is used for the disposal of syringes, needles, cartridges, empty or partially used injection vials/ampoules and other sharp instruments that have been contaminated with medicines, but not cytotoxic or cytostatic.

Clinical Waste:

Any human tissue, disposable items and materials that have been used on patients (and may be contaminated with bodily fluids), e.g. dressings, wipes, glove, aprons and paper tissues.

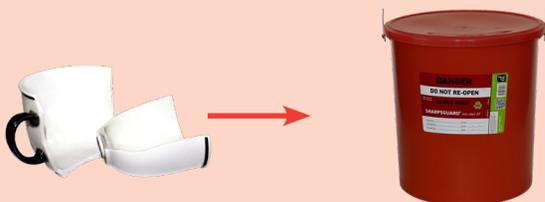

Domestic household waste:

Items such as used paper towels, newspapers, flowers and clean packaging – similar to the type of waste produced in the home.

Glass and broken crockery waste:

Empty washed glass bottles, jars and broken crockery.

Special Waste:

e.g. mercury, batteries, chemicals, radioactive and cytotoxic materials. Check with your supervisor/manager to find the correct procedures for disposing of this type of waste.

If you have questions or need further information, please contact your local Area Manager or our Customer Service Team on +44 1706 754980 or info.healthcareuk@mauserpackaging.com and visit our website www.daniels.co.uk.
