WIVA™ Infinity

Giving plastic a new life

REDEFINING SUSTAINABILITY

A Mauser Packaging
Solutions brand

WIVA™ Infinity

The world's first UN-approved clinical waste container made from Post-Consumer Recycled Resin (PCR)

Introducing our latest development in our sustainable range, WIVA™ Infinity clinical waste container made of responsibly sourced recycled plastic, created for the disposal of healthcare clinical waste and designed to support the NHS in achieving its environmental sustainability goals.

Following the successful launch of our SHARPSGUARD® *eco pharmi*, the WIVA™ Infinity is the next sustainable product offering from Daniels Healthcare, providing a cost-effective and sustainable solution to the healthcare sector, while still meeting the highest standards in quality and safety.

This is a huge step in our long-term strategy to reduce single use plastics and minimising the impact on the environment; and the next stride towards our vision to be the most innovative sharps and clinical waste solutions company in the UK and Europe.

WIVA™ Infinity

*Environmentally-inspired
and award-winning*

We are the leading provider of sharps and clinical waste containers to the UK healthcare sector, offering our customers true sustainability at scale.

Grey is the new green

If all UK users
of WIVA™ VAT 5 containers
convert to the new WIVA™
Infinity, it would deliver a
950-tonne
reduction of virgin plastic use
- that's the weight of
271
ambulances

- ◆ Grey lid and base are made from sustainably sourced recycled material using state-of-the-art manufacturing technology.
- ◆ The pioneering concept has already received an innovation award for future-leading sustainability.
- ◆ Successfully rolled out in The Netherlands and Belgium with evidence to suggest that customers can reduce their equivalent Co2 footprint by 50% when switching to the WIVA™ Infinity range.
- ◆ Adopted by the majority of Teaching Hospitals In The Netherlands.

WIVA™ Infinity

product overview

Combining the superior protection and handling of specific healthcare risk waste with the environmental benefits of using recycled plastic resin.

- ◆ Three sizes of container: 30, 50 and 60 litres.
- ◆ Maximum filling weights:
 - ◆ 30L: 12kg
 - ◆ 50L: 15kg
 - ◆ 60L: 15kg
- ◆ Two different lid variants available in, solid and porthole.
- ◆ Lid options available in colours to facilitate correct waste disposal, in line with HTM07-01 Guidance¹.
- ◆ Range of pedal bin mobile holders for easy transportation to the point of use, and hand-free disposal.
- ◆ Certified to UN3291² and performance tested for leak resistance, stability and impact resistance tests based on ISO23907 and NFX 30-511 standards.
- ◆ Label with clear sections to record dates, locations, users and appropriate EWC code ready for collection.
- ◆ Stackable and stable when empty and full, optimising storage.

Mauser UK Ltd, trading as Daniels Healthcare, manufactures and markets sharps and clinical waste containers for hospitals, surgeries, councils and the clinical waste industry.

¹ Management and disposal of healthcare waste (HTM 07-01)

² UN3291 certified containers are suitable for the transportation of Category B infectious waste
