

Healthcare Product Brochure

Manufacturer and provider of the highest quality sharps and medical waste containers to the healthcare market.

REDEFINING SUSTAINABILITY

 **MAUSER**
Packaging Solutions

About Mauser Packaging Solutions

A global leader in packaging solutions and services, Mauser Packaging Solutions supplies high-quality plastic, metal, fibre and hybrid packaging of all sizes to industries around the world.

True sustainability at scale

Its unparalleled, innovative solutions cover the full packaging life cycle, delivering customised, environmentally friendly options that help businesses around the world reduce their ecological footprint.

Global reach, global impact

Mauser Packaging Solutions' global network of design, manufacturing, reconditioning and recycling facilities delivers high-quality solutions worldwide, helping customers boost their efficiency, consistency and performance.

Our healthcare division

The vision is to be the most innovative sharps and medical waste solutions company in Europe by providing the healthcare sector with safe, sustainable and cost-effective solutions.

Protecting patients and healthcare professionals

In the healthcare industry, keeping patients and personnel safe from exposure to potentially dangerous medical waste is a key concern that requires strict protocols and durable, easy-to-use containment systems.

Mauser Packaging Solutions offers hospitals, laboratories and health centres an extensive range of industry-proven medical waste containers.

The SHARPSGUARD® and WIVA™ containment solutions can handle every category of medical waste, including sharp instruments, anatomical waste and infectious materials.

Giving plastics a new life

Mauser Packaging Solutions is firmly committed to reducing the environmental impact of its products. The products in the highly successful WIVA™ Infinity Series and SHARPSGUARD® eco ranges incorporate responsibly sourced recycled material.

Containers manufactured and certified to:

- ◆ ISO 9001 quality system certification
- ◆ ISO 23907-1:2019 standard for sharp injury protection
- ◆ UN 3291 safe transportation of medical waste.
- ◆ AFNOR NF302 accreditation

Product excellence and after-sales support

Mauser Packaging Solutions prides itself in building customer relationships to enable safe and confident use of its products in clinical settings.

Its sales and customer service teams are uniquely trained with genuine insight into the challenges faced by busy healthcare professionals.

- ◆ Experienced product advice
- ◆ Unique QR codes on sharps containers for immediate and specific training and information
- ◆ Online educational materials for customers in delivering safe working practices.

Safe for users, sustainable for the planet

Mauser Packaging Solutions is proud to be at the forefront of delivering the next generation of sustainable healthcare products to help protect the planet and ensure the safety of patients and healthcare professionals.

Manufacturing containers made from responsibly sourced recycled material and business-wide carbon-saving processes help hospitals and the wider healthcare market to achieve their environmental and sustainability objectives.

Mauser Packaging Solutions holds and maintains:

- ◆ ISO 50001 certification in energy efficiency
- ◆ ISO 14001 certification environmental management system.

Cornerstones of Sustainability

Healthcare products and devices should be safe for users and also sustainable for the planet.

Sustainability comes via a four-part commitment:

- ◆ **Commitment:** Our company's enduring commitment to delivering sustainability at scale
- ◆ **Innovation:** Our spirit of innovation and focus on the future; always working to solve problems for customers today and tomorrow
- ◆ **Excellence:** Our industry-leading portfolio delivers an unparalleled range of quality products. Setting a new standard for excellence around the world
- ◆ **Passion:** Our employees' passion for the products we manufacture, the services we provide and their resourcefulness to be better, every day

Sustainability Report

WIVA™ Clinical Waste Containers

The WIVA™ range is the most recognisable and trusted medical waste container across Europe. Designed and manufactured with user safety in mind, more than 75% of the UK's National Health Service choose Mauser Packaging Solutions for their sharps and medical waste container needs.

VAT5 Range

The WIVA™ range of clinical waste containers offer waste managers working in hospitals, clinics or laboratories a safe solution for the storage and transport of their healthcare waste.

The containers are manufactured to comply with UN3291, and the WIVA™ 60L with a solid lid is also suitable for Category A Waste by complying with UN3549 when used with two UN-approved bulk clinical waste bags and overlay label.

Features and benefits:

- ◆ Range of sizes 30L, 50L & 60L
- ◆ Supports waste segregation with wide range of available colours
- ◆ Lid options available
- ◆ Efficient storage with stackable lids and containers
- ◆ Trolleys available for easy movement and transportation.

WIVA™ Infinity Range

A sustainable solution to the healthcare sector and minimising the impact on the environment.

The WIVA™ Infinity range of medical waste containers is the world's first UN-approved medical waste container made from Post-Consumer Recycled Resin (PCR).

They come with the same features of the WIVA™ VAT5 range with the added benefit of being made from responsibly sourced recycled plastic. Providing a cost-effective and sustainable solution to the healthcare sector for their waste, while still meeting the highest standards in quality and safety.

Features and benefits:

- ◆ Grey base and lid made using PCR
- ◆ Lid options available in colours to facilitate correct waste disposal
- ◆ Efficient storage with stackable lids and containers
- ◆ Trolleys available to easy movement and transportation.

Giving plastics a new life

SHARPSGUARD® sharps and clinical waste containers

Since its launch in 2003, SHARPSGUARD® has become one of the most trusted sharps containers on the market, with more than 75% of the UK's National Health Service choosing them.

SHARPSGUARD® containers are made using at least 40% recycled material, designed and manufactured with user safety in mind. Fully compliant with UN 3291, NF302 and ISO 23907-1 standards.

Features and benefits:

- ◆ Comprehensive range of sizes: 0.3L to 40L
- ◆ Supports waste segregation with wide range of available colours
- ◆ Made from at least 40% recycled material
- ◆ Maximised usable capacity with high fill line
- ◆ Space saving with flat lids and stackable containers
- ◆ Temporary and permanent closing system
- ◆ Training at the point-of-use with unique QR codes
- ◆ Accessories available to secure safely at the point-of-use.

Safe and easy to use

SHARPSGUARD® eco container ranges are used for the disposal of infectious waste such as sharps, out of date pharmaceuticals or recognisable body parts.

Giving plastics a new life

POUDS® Point of Use Disposal System

The POUDS® range of accessories helps reduce the risk of sharps injuries by bringing the SHARPSGUARD® containers closer to the point-of-use.

The range supports you in complying with EU Directive 2010/32 which lays out regulatory guidelines to prevent sharps injuries in hospital and healthcare environments.

- ◆ POUDS® trays
- ◆ POUDS® brackets
- ◆ POUDS® mobile holders
- ◆ POUDS® base stands

DANIELS® Transport Containers

The transport containers are designed to provide healthcare professionals in the community, hospital staff and emergency responders with a safe way to transport specimens or handle and dispose of sharps* while on the move.

The containers come in a range of sizes and adhere to packaging regulations for transporting contaminated sharps*, clinical waste and specimens.

The smaller containers come with in-car brackets to aid more secure transportation.

*when used in conjunction with a SHARPSGUARD® sharps container

Diagnostic Specimen Containers
Available in a 7L and 30L

Community Nursing Container

DANIELS® danicentre

The patented DANIELS® danicentre is a wall-mounted utility cabinet with integral compartments for dispensing disposable gloves, overshoes or aprons as well as hand disinfection lotion.

The large oval apertures allow easy access to each compartment and an elongated dispensing slot in the lower section can also handle couch rolls, paper towels or rolls of bags. There is also the option of having a bottle holder for attaching a disinfection bottle to the unit.

Category A Clinical Waste Solutions

Mauser Packaging Solutions offers the following solutions for the containment of Category A medical waste to ensure that dangerous waste is secured safely.

WIVA™ VAT5 60L or Infinity 60L

- WIVA™ VAT5 60l container with a solid lid, when used with two UN-approved bulk medical waste bags and overlay label. Suitable for UN3549 categorised waste.
- WIVA™ Infinity 60l container with a solid lid, when used with two UN-approved bulk medical waste bags and overlay label. Suitable for UN3549 categorised waste.

WIVA™ MedProtec620

Designed for safe and secure disposal of waste with the highest risk of infection. Our WIVA™ MedProtec620 meets the high stands of UN2814 & UN2900. It is made up in five layers. The inner packaging contains a leak-proof drum as the

primary receptacle, it then includes two leak-proof secondary receptacles with absorbent material between the primary and secondary packaging and this is all held in a rigid cardboard outer packaging.

WIVA™ Vanguard CatA Pack

The WIVA™ Vanguard CatA Pack is built up with a WIVA™ VAT5 medical waste container in at the centre, then in a plastic bag containing liquid absorbing material, this is then surrounded by shock absorbing polystyrene blocks which is all held within a 220L X-approved Vanguard drum. Suitable for UN3549 categorised waste.
