

NEW: SHARPSGUARD® eco 24L

A world-first in sustainable sharps safety
The first regulated sharps container made using recycled NHS healthcare waste

What's new?

- ◆ First of its kind globally – made using NHS healthcare waste
- ◆ Up to **80%** post-consumer recycled plastic, and up to **40%** from clinical settings
- ◆ Same certified performance and compliance
- ◆ **14%** more usable capacity with the same footprint as the 22L
- ◆ Same price as the 22L it replaces

The SHARPSGUARD® eco 24L is now shipping as standard in place of the 22L.

Daniels Healthcare is proud to be the only manufacturer in the world producing regulated sharps containers using recycled NHS healthcare waste.

Why it matters

Every year, the NHS generates significant volumes of plastic healthcare waste. Now, for the first time, some of that waste is being transformed back into safe, compliant sharps containers – only available from Daniels Healthcare.

- ◆ Supports NHS Net Zero goals – with reduced carbon impact
- ◆ Diverts plastic waste from landfill and incineration
- ◆ Developed over two years with NHS and recycling experts
- ◆ Manufactured in the UK, supporting local jobs and innovation
- ◆ Meets all UN3291 clinical waste container standards

The positive difference

	22L SHARPSGUARD®	NEW 24L SHARPSGUARD® eco	Benefit
Usable capacity	17.86L	20.6L	+14% more disposal space
Sustainable content	40% PCR	Up to 80% PCR (up to 40% healthcare waste)	+73% more recycled plastic
Carbon footprint	Standard	Reduced	Lower lifecycle CO2 emissions
Price	Standard	Same	Better value per litre
